Course Number and Name: ID3630

Instructor Name: Melissa Pyell

Course Term Start Date: February 28, 2022

Assignment: WEEK 2 Business Cards, Letterhead & Envelope

TUCKER TRIMBLE INTERIORS

Dear Beau Clowney,

My name is Tucker Trimble and I am from Yeamans Hall in Charleston, South Carolina and Cape Neddick, Maine. I began my love of design in Charleston when my parents worked with an architect to develop two properties in Charleston. The first was a guest house and the second was the historic property Catfish Row, which has been a rental property since before the turn of the century. My father throughout my life has talked to me about the design decisions he chose as client, specifically his desire to modernize Catfish Row through a glass edition while keeping its local character (as you probably know Catfish Row is the fictional setting of the first American Opera in the United States called Porgy and Bess). This laid the foundation for me to love architectural work that that values historical preservation, which is something I believe you do very well.

I have admired your design since I ventured out on my own in 2018. I love and hope to emulate in my own career how you preserve the local character of historic buildings while adding beautiful modern elements. As a Charlestonian, I have also seen your work in person and I have been awestruck by it. I am a member of St. Andrews Church in Mount Pleasant, a project that you worked on and I benefit from your stunning and practical design work. While you are one of our premiere architecture firms in the entire Southern region and I am an interior design student, I have run six entire residential design renovations as the head of my firm Tucker Trimble Interiors. I am proficient in both Revit and AutoCad. I am dedicated, flexible and can see both the big and the small picture. I want to intern for an architecture firm because I desire to one day do commercial design and your firm's residential and commercial projects display the values of beauty, simplicity, clean lines, which are all things I hope my own projects will show throughout my design career. I look forward to hearing from you.

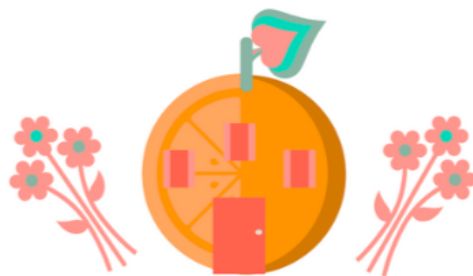

Yours sincerely,

Tucker Trimble
